

A line graph with two curves plotted against an unlabeled vertical axis. The horizontal axis is labeled 'Temperature'. The upper curve is green and labeled P_{gross} . It starts at a moderate value on the left, rises to a peak in the middle, and then falls back to a moderate value on the right. The lower curve is red and labeled R . It starts at a low value on the left, rises to a peak that is shifted to the right of the green curve's peak, and then falls back to a low value on the right. Both curves are smooth and continuous.
